KWALU ANSWERS BARIATRIC DINING CHAIRS DILEMMA

Atlanta, GA, November 24, 2008 – Kwalu has announced that it has developed a solution for the increasing dilemma of dining room chairs for the bariatric person – the Kwalu Bariatric Dining Chair.

The Bariatric Dining Chair is designed to withstand weights above 250lbs (500, 700, or 1000lb versions) while keeping the same aesthetic appeal of other regular sized chairs in a dining room. Kwalu provides collections where the designs of the different chairs work together to allow the unique bariatric needs to be accommodated while ensuring that the bariatric patient or resident does not feel stigmatized from the rest of the room.

“We are pleased to be able to offer our customers the option of the stylish bariatric dining chair,” said Michael Zusman, CEO of Kwalu. “With bariatric needs increasing across the board, we felt it necessary to provide solutions that would complement our other collections so as to not compromise aesthetic appeal and allow our customers to have options for their larger sized patients and residents to keep them from feeling ostracized.”

In some instances, chair selections can be so similar that people may find it hard to notice a difference in the chairs aside from the width of the seat, assuring the bariatric patient the dignity he or she deserves. Kwalu also provides other bariatric seating options for lounge and lobby areas and patient and resident room seating.

Kwalu provides complete furniture and wall protection solutions through innovative, low-maintenance, anti-bacterial designs that look great and last. Kwalu offers Virtually Indestructible™ Seating, Tables, Casegoods and Wall Protection, all backed by 25 years of service excellence with a 10-year product warranty on construction and finish. For more information on Kwalu please contact 877- MY-KWALU (695-9258) or visit www.kwalu.com.
