

## Protea™ Plus Seating – Greenhealth Approved™

### A Proven Material, Now PVC-Free

Protea Plus has all the same performance qualities as our standard Protea – strength, durability, bleach-cleanability, resistance to moisture, and wood-look warmth – with one important difference: it eliminates PVC.

PVC is one of the primary chemicals of concern identified in the Healthy Interiors criteria (v2.4). By removing it, Protea Plus seating frames qualify as Greenhealth Approved™, helping designers and healthcare systems create healthier interiors.

#### Why it Matters:

- **PVC-Free Confidence** – Meets a core Healthy Interiors requirement by eliminating PVC.
- **No Added Chemicals of Concern** – Free from added PFCs, antimicrobials, & flame retardants.
- **Same Proven Performance** – Just like Protea, Protea Plus delivers durability, cleanability, and long service life – reducing replacement cycles and supporting sustainability goals.

#### Conditions to Qualify

To qualify as Greenhealth Approved, seating products must be ordered with Protea Plus. They must also be specified without Fusion or Solid Surface components, nailhead trim, power modules, or heat/massage features, and when paired with compliant upholstery/COM fabrics.

#### Additional Certifications

In addition to meeting Greenhealth/Healthy Interiors criteria, Protea Plus seating also carries SCS Indoor Advantage™ Gold certification for Indoor Air Quality.

#### Available Finishes

Protea Plus is currently offered in 5 finishes:

Light Walnut

Northern Walnut

Patagonian  
Cherry

Weathered Teak

Sugar Maple
