

For Immediate Release

Kwalu Debuts New Seating and Tables for Hospitality-Inspired Senior Living at EFA 2026

Atlanta — March 16, 2026 — As senior living communities increasingly adopt hospitality-inspired environments, Kwalu debuts five new furniture introductions at the Environments for Aging Conference + Expo in Phoenix. The launches include new dining seating, table collections, and a credenza designed for the café, bistro, and lounge spaces becoming central to social life within today's communities.

At EFA, Kwalu presents a café, bistro, and lounge-inspired settings that bring these spaces to life through a mix of dining seating, coffee and side tables, and custom elements that support how residents gather, relax, and connect throughout the day.

Among the introductions are the Lano and Camber dining chairs, along with the Keaton and Jensen collections of coffee and side tables designed for café, lounge, and shared social spaces. Kwalu also debuts the Nashville Credenza, extending the Nashville design language into hospitality-focused environments such as cafés, bistros, and lounge areas.

Each of the new designs is crafted with Kwalu's proprietary Protea™ or Protea™ Fusion, engineered to maintain its appearance over time in demanding environments.

The booth also highlights Kwalu's custom capabilities, with several custom furniture elements incorporated throughout the space.

"Senior living communities are designing more social, hospitality-inspired environments," said Damion Van Slyke, Vice President of Marketing at Kwalu. "Our latest launches help create the café, bistro, and lounge spaces that are becoming central gathering places in today's communities."

Visitors can see the new introductions at Booth 401 during the conference. Those not attending EFA can explore the collections at kwalu.com/EFA-2026.
