

## Product Construction: Protea™ & Protea Fusion

### Innovation in Every Detail

What sets us apart is Protea, our proprietary, non-porous material that offers the beauty of wood with unmatched durability. Inspired by the resilient Protea flower, it ensures our furniture withstands high-traffic environments while remaining easy to clean and maintain.

#### Protea (Most Kwalu Seating is made using this method)

1/8" thick high-impact resistant polymer finish

Steel-reinforced at joints and stress points

High density polyurethane

US Patent No. 5,067,842

#### Protea Fusion (Most Kwalu Casegoods and Table Tops)

1.2mm thick high-impact resistant non-porous polymer that withstands sustained abuse

45 lbs/cubic ft Particleboard

US Patent Pending No. US11/581,827
